Surviving Panzer II Tanks

Last update : 25 August 2026

Listed here are the tanks in the Panzer II family that still exist today.

Mathieu George, June 2014

PzKpfw. II Ausf. c – Musée des Blindés, Saumur (France) – running condition

According to Hillary Louis Doyle, this is the oldest preserved Panzer II known to date. This c version was produced in 1937 by MAN between the b and the A version. Yes, the first versions of the tank are designated by a lower case letter, then by a capital letter starting from the beginning of the alphabet. The c-versions are distinguished by several main features: - the pilot's vision hatch specific to models a, b and c, which is large without a vision slot and whose supports are placed on either side of the small vision holes under armour. - the shape of the fan louvers, different from those that appear from the Panzer II A - the undercarriage, different from that fitted to the a and b models. This tank comes from the Trun scrapyard (Rudi Schoeters). When found in the scrapyard, it had the divisional sign of the 2nd Pz Division under the grey/yellow paint, which was its original panzer unit. The 2nd Panzer Division was in Poland 1939, France 1940, Balkans 1941 and Russia 1941-42, and this Pz II was there with the 2nd PzD. Obviously by 1942 it was an obsolete panzer and must have been withdrawn from service for second line duties. However it was then in Normandy in 1944, as a front line combat vehicle again, tactical number 304 (there is also a WWII photo of Pz II #303, KO'd near St Lambert, Normandy). Both 303 and 304 have by then been converted to PzBeobachtung Wagen II and carried large external frame radio antenna. Their possible unit was Sturm Panzer Abt 217 (Brummbars), they were then clearly command, control and observation vehicles after conversion. The British tank restoration company of the Cadman brothers was given the contract to restore the tank. It was restored by their chief mechanic Steve Cobb. When finished it made its debut straight off a low loader and into the Tank Museum's Carousel display in Saumur (Steve Cobb).

PzKpfw. II Ausf. A – Kalemegdan Military Museum, Belgrade (Serbia)

Fahrgestell Number 23041. Ausf. A were Fgst. Nr. 23001 to 23422 (Herbert Ackermans)

Pierre-Olivier Buan, September 2024

PzKpfw. II Ausf. A – Canadian War Museum, Ottawa (Canada)

Going by the Sehklappe on the Aufbau, Ausf. A or B, but no deflectors on the Aufbau, so Ausf. A (Herbert Ackermans)

Jim Goetz, August 2015

PzKpfw. II Ausf. B – Military Historical Museum, Lenino-Snegiri (Russia)

Fahrgestell number 25015. The tank was restored from an incomplete lower hull, found in 1995 in Istra lake by I.V.Usanevich, with some roadwheels missing, but with its tracks. The entire upper hull and turret were reconstructed. The restoration was made by "Leibstandarte workshop", Dmitry Bushmakow. Tank before restoration : http://83.222.2.116/wshow.htm?p=168

PzKpfw. II Ausf. F – Bovington Tank Museum (UK)

Fahrgestell number 28434. The Museum's exhibit was built in May 1942 and shipped to Tunisia in December 1942 where it served with the Reconnaissance Platoon of Panzer Regiment 7, 10th Panzer Division. British forces captured it when the Germans were defeated in Tunisia in May 1943. It is currently displayed in the markings of the 1st Panzer Division at the time of the German invasion of France in May 1940 (official information from the museum)

PzKpfw. II Ausf. F – U.S. Army Armor & Cavalry Collection, Fort Benning, GA (USA)

This Panzer II ausf F was once part of Panzer-Abteilung 190 in the 90. Liechte Division in North Africa. It was captured, along with an SdKfz 233 8-rad armored car by the U.S. 1st Ranger Battalion at El Guettar, Tunisia in the Spring of 1943. After its capture, it was painted with U.S. markings. The Panzer II was shipped to the Aberdeen Proving Grounds for trials and placed in the Ordnance Museum collection after the war (Garry Redmon). This tank was on loan to the Panzermuseum Munster (Germany) and was brought back to the USA in June 2012 (Don Moriarty)

Wespe – Deutsches Panzermuseum Munster (Germany)

Pierre-Olivier Buan, March 2019

Wespe – Musée des Blindés, Saumur (France)

Patriot Park, December 2018

Wespe – Patriot Park, Kubinka (Russia)

Fahrgestell Number 31081, April 1943 production. This Wespe served in the Division “Das Reich”, and carried the name “Prag”. It is believed to be the sole survivor of the Kursk battle, from southern sector (another survivor might be Kubinka’s Nashorn, but it is not confirmed). The original muzzle brake was removed from the vehicle, fitted and welded on Kubinka’s Nashorn. Roman Alymov donated another muzzle brake, which is now mouned on the barrel (Yuri Pasholok)

Marder II – U.S. Army Armor & Cavalry Collection, Fort Benning, GA (USA)

Fahrgestell number 28042 (USA AFVs register). This vehicle was part of the 1. Panzer Division in its Panzer Aufklärungs Abteilung (reconnaissance battalion). The 1. Panzer Division was listed as still having 12 Marder IIs as of March 1945. It has been shipped to the United States after having been surrendered in Austria to the U.S. forces as the war ended (Garry Redmon)

Falk Springer – Fahrzeuge-der-Wehrmacht.de

PzKpfw. II Ausf. F – Westwall Museum, Pirmasens (Germany)

Most of it will be scratch built with only a few original parts. The turret looks original , the upper armour is replica and the hull is original BUT from a Wespe, not from a Panzer II. It is very recognizable since it's completely different and longer than that of a Panzer II (Rudi Schoeters). The suspension is also typical of a Wespe and was not used on any other vehicle of the Panzer II family (Dmitry Bushmakow)
